# Today's GAME

**WASHINGTON HUSKIES (3-1) vs.  
CALIFORNIA GOLDEN BEARS (3-2)**

## Passing Fancy Rampant Throughout the Pac-10

*By Jim Daves*

Can you win the Pac-10 title by throwing the ball?

As the Huskies enter the conference race this week a debate seems to have broken out regarding Washington's hyper-productive offense. Does UW need to develop a better ground game if it hopes to earn another trip to the Rose Bowl?

After four games the Huskies are averaging 503.5 yards of total offense per game. That's by far the best mark in the Pac-10. Stanford trails the Huskies in that statistics at 430 yards per game. Six of the league's schools are below 400 yards per game.

No surprise to Husky fans, but the vast majority of the total offense comes from Washington's passing game. Husky quarterback Cody Pickett and his wonderful cast of receivers is on record-setting pace averaging 384.8 passing yards per game. The cross-state Cougars are second in the Pac-10 at 308.4 passing yards per game.

As Husky coach Rick Neuheisel said last week following's Pickett's 438-yard passing performance, this edition of Husky football is

**Junior Greg Carothers returned a fumble for a touchdown against Idaho, the Huskies' second defensive score of the season.**

putting up some numbers that fans have not seen around here in the past. The school record

# Today's GAME

*Continued from page 3*

for average total offense in a season is 471.9 yards per game set by the 1991 team that won the national championship. The Huskies offense was pretty even that particular year, passing for 240 yards per game while averaging 231.9 rushing yards.

But was the "attack" really that balanced?

Take a closer look at the game statistics, and you will see that offensive coordinator Keith Gilbertson used the passing game to get the Huskies out front, and the run to finish off opponents.

During the first half of 12 games in 1991 the Huskies averaged 160.4 passing yards and 96.3 rushing yards.

The Huskies are currently averaging 118.8 rushing yards per game. That figures seventh in a conference with no team averaging more than 187 rushing yards per game.

Wait a minute. Stanford, a traditional pass-

**Junior Cody Pickett has passed for over 400 yards in each of the past two games, and ranks second in the nation in total offense.**

ing team, is leading the Pac-10 in rushing with an average of 187.3 yards per game? If the regular season were to end today, that would be the lowest single-season average since the conference has tracked the statistics in 1954. Over the past 48 seasons, the league's rushing champion has averaged more than 200 yards per game in all but three seasons.

Can you win the Pac-10 title by throwing the ball? The way things are going; somebody is going to do it this year.

\*\*\*

As the Huskies begin their quest for the Pac-10 championship, remember this impressive statistic. Over the past 25 seasons, Washington has won

or finished second in the Pac-10 18 times. Next time your friends want to argue over the best program in the Pac-10, pull that one out.

\*\*\*

Saturday's game was supposed to be a huge homecoming of sorts. Former Husky safety Curtis Williams, who died last May at his brother David's home in Fresno, was going to attend this year's California game. It would have marked the first time he saw his Huskies play a regular-season home game since he was paralyzed during the 2000 season.

Williams attended the Spring Game and a benefit dinner last April, just a week before passing away. He expressed a strong desire to come back for a "real game" and had talked about this being the week for very obvious reasons.

One of Curtis' older brothers, J.D., is in his first year as an assistant coach for the Golden Bears. A standout player at Fresno State, J.D. had a six-year career in the NFL that included four Super Bowl appearances.

Just imagine the ovation Curtis would have received as the Husky

**Senior Braxton Cleman returned from a one-year layoff to rush for 39 yards on just nine carries against Idaho.**

Legend at the start of the fourth quarter. It would have been a great family reunion for both the Williams' family and the Huskies' family.

\*\*\*

Keep your eye on California's Lashaun Ward when the Golden Bears have to return a kickoff. He's averaging almost 30 yards per return, the best average in the Pac-10 this season. It is interesting to note that have 43 games have been played by Pac-10 teams this season, the longest kickoff return by anyone has been 56 yards by Ward against Michigan State.

\*\*\*

Yes, Derrick Johnson played in last week's win against Idaho. You probably missed him. Of the 40 passes the Vandals attempted, only two went Johnson's direction. That might tell you something about the respect he is gaining from opponents. Then again, after seeing Roc Alexander break up several throws with great defense and hard hitting, Johnson might see more action in the future.

\*\*\*

Since last week's column included a note about Husky tight end Kevin Ware being the most overlooked Husky player, and Ware had a career best day against Idaho with six receptions for 54 yards and two scores, we'll mention him again to see if there is a little mojo going on here.

# Sonny's SCOOP & STATS

with Husky Great Sonny Sixkiller

## Home Winning Streak

Washington enters Saturday's game with the longest active home winning streak in the Pac-10 Conference at school-record-tying (modern) 17 games. Nebraska's 24-game home win streak is the nation's longest; Miami's 18-game Orange Bowl streak is second-longest. The last time the Huskies lost a home game was a 28-7 defeat at the hands of Arizona State on Oct. 16, 1999. The Dawgs won their remaining two home games that year, and won all six games at Husky Stadium in each of the last two years. This year, the Husky schedule includes seven home games, including five in a row in the early part of the season. The streak ties the modern Husky record for consecutive home wins, previously set between 1991 and 1993, so if the Huskies can beat California on Saturday, they'll set a new modern school record. Last year, Oregon ran its home win streak to 23 games before losing to Stanford at Autzen Stadium. The Pac-10 record for home win streak is 26 (California, 1919-23). The Huskies' all-time record is 44 straight home wins, set from 1908 to 1917 (mostly prior to the founding of the conference), in the midst of the UW's 63-game overall unbeaten streak, still an NCAA record. The 44-game home win streak was broken by a 0-0 tie with Oregon State in 1917, but the UW went on to win six more home games after that, extending their home unbeaten streak to 51 games. The 44-game home winning streak is still the sixth-longest in NCAA history.

## Huskies vs. Bay Area Schools

Washington has a combined record of 93-65-8 (.572) vs. opponents from the San Francisco Bay Area. Washington is 45-32-4 against California, 38-32-4 vs. Stanford, 8-0 vs. San Jose State, 1-1 vs. St. Mary's and 1-0 vs. Santa Clara. The Huskies haven't played Santa Clara since 1935 and haven't faced St. Mary's since 1947. Since 1977, Washington is 45-2-0 (.957) vs. Bay Area teams: 19-0 vs. Cal, 19-2 vs. Stanford and 7-0 vs. San Jose State.

## Tough After Turnovers

While the fact that Washington has committed 10 turnovers through four games this year (eight lost fumbles, two interceptions) is perhaps the most disconcerting statistic of the early part of the season, the UW defense has played very well after those turnovers. Husky opponents have managed to turn 10 turnovers into only two scores – touchdowns by Michigan and by Wyoming, good for 14 points. By contrast, the Huskies have converted seven of their eight takeaways this season into points – four touchdowns and three field goals, a total of 37 points.

# PRESSURE *Kicker*

by *Mason Kelley*

**T**he day is Oct. 6, 2001, and USC's Carson Palmer has brought to a whisper a nervous crowd of 72,946 at Husky Stadium, hitting receiver Kareem Kelly with a 58-yard touchdown pass to tie the Huskies at 24-24 with 3:47 remaining in the fourth quarter.

After the ensuing kickoff leaves the Huskies with 65 yards between victory and defeat, the Washington offense starts its drive. All eyes focus on quarterback Cody Pickett and his quick passes to the sidelines, and on Willie Hurst's shake-and-bake moves which earn the Huskies precious yards.

All eyes but two, that is. Placekicker John Anderson has his attention focused on the ball in front of him, drilling it into a net repeatedly in anticipation of the moment to come.

A few Pickett passes and Hurst runs later and the Huskies are at the Trojans' 16-yard line, with just three seconds remaining. Anderson's eyes turn towards the goalposts. The game, now, is his to win.

Fans fidget anxiously, twisting their game programs in nervous anticipation of the kick. Senior Larry Tripplett begins removing tape from his ankles — he's seen this before. Several players hold

hands on the sidelines.

The eyes of 72,946 are upon him, but John Anderson is in a world of his own.

With a preternatural calm, Anderson takes three steps, and with his right leg crushes a 32-yard field goal as time expires, giving the Huskies the win. Teammates mob Anderson while fans mob each other, all celebrating Washington's first walk-off field goal since 1980. On the sidelines, Tripplett continues to remove his tape.

"Are you kidding me?" Tripplett said to reporters who wondered why the senior seemed so relaxed before the kick. "That's John Anderson."

Perhaps the only person more calm before the kick than Tripplett was surprisingly, Anderson himself.

"To be a good kicker you have to be laid-back," Anderson says. "You can't worry about the situation, you can't think, 'Oh, man, if I miss this we lose.' I look at it like everyone out there has given it his all, from every scout player in practice, to everyone who plays in the

game. They have all done their job to get to that point, and I just want to go out there and do my job."

A native of Boynton Beach, Fla., Anderson did not follow the traditional "youth-soccer-player-converts-skills-to-placekicker" model that so many in his profession have. Instead, Anderson grew up playing for the only youth team in the league that kicked its own field goals, and thus knew from his first days of pee-wee football that his destiny was to kick.

"Being from Florida, if you don't look like Rich Alexis or Charles Frederick, you have to find other ways to get on the field," Anderson says, citing the outstanding speed and receiving skills of his fellow Husky teammates, both graduates of the same high school as Anderson in Boca Raton, Fla. "For me, that was through kicking, something I have

**Last season, Anderson booted two last-second field goals, sealing Husky victories against USC and Arizona State.**

*Continued on page 8*

**John Anderson**

## JOHN ANDERSON

*Continued from page 6*

always been good at.”

It wasn't until high school, though, that Anderson began thinking of taking his skills to the collegiate level.

“After my junior year, I began to get recruited by schools I never thought I would be able to play for,” he says. “It was a pretty cool feeling, a great chance to go to school, and an amazing chance to be a part of something that is really unique.”

While the major east-coast colleges had a geographic advantage in recruiting Anderson, most envisioned him as a punter, while Washington promised Anderson the chance to win the starting placekicker job as a true freshman.

“You always want to go where you are wanted and I really felt wanted here,” he says. “It was an excellent chance to play right away. I wasn't following a superstar and the team needed a kicker really bad, so it was a good opportunity.”

Anderson's time at Washington has been a series of highs and lows. Kickers are in a no-win situation: since kickers are expected by fans to make each field goal, successful conversions generally garner only polite applause, and sighs of relief. Misses, however, elicit groans and occasionally, boos, as fans lament failure at the “easiest” part of the game. Except in rare occasions, it is impossible to exceed fans' expectations — you can only meet them, or fall short. It takes the right personality to be able to handle that kind of pressure, and Anderson takes it all in stride.

“Everyone misses a block or a tackle, but they get several more plays to make up for it — I only get four or five chances a game to do my job,” he says. “When I miss, I forget about it. I look at it like, ‘Hey, I messed up.’ For every one field goal I miss, I know I have to make two to vindicate myself.”

Anderson's positive attitude can be directly attributed to his upbringing by perhaps the most supportive parents in all of college football. The Andersons are so devoted, in fact, that they travel from Florida to nearly every game the Huskies play. Father Jeff has missed just one game in four years, while mother Patti has missed two.

“I have the two most supportive parents in the whole world,” Anderson says. “I talk to them two or three times a day and I couldn't ask for anything more from them. The best moment of my college career was after the 2001 Rose Bowl was when I got to go over to the stands and give my mom and dad a hug.”

Anderson's parents eagerly follow not only the careers of their own son, but also those of Alexis and Frederick, high-school teammates of Anderson's who followed the kicker to Seattle in 2000 and 2001, respectively.

**Anderson, who also handles kickoffs, has 39 career field goals, third all-time at Washington, while his 56-yarder against UCLA in 1999 equaled the school record.**

Anderson, Alexis and Frederick come from different backgrounds, but have become the best of friends.

“I love those two kids, we are kind of like a family,” Anderson says. “There are not a lot of guys on this team that can, 1) say they are from Florida, or, 2) say they have known each other for eight years. It is a special thing that the three of us share. They are like my two brothers up here.”

With the Florida trio leading the way, the Huskies are primed for a successful season this year, and Anderson is looking forward to the possibilities.

“I want to kick as well as I can in every game,” he says. “I don't set personal goals because there shouldn't be personal goals in football. It is a team game, and I just want to do my job well enough to help this team win.”

Anderson is happy for the opportunities he has had, and would love to play in the NFL if possible. As always, though, he is taking it all in stride.

“I am approaching that the same way I approached playing in college,” he says. “If it happens, I would be the luckiest person in the world, and if it doesn't, I am still going to get a degree from an excellent university. It's a win-win situation.”

It is Anderson's appreciation for everything in his life that allows him to roll through pressure with the ease of riding a wave.

“Every game is a new experience that I will treasure forever,” he says.

In a profession where exceeding expectations is next to impossible, John Anderson's positive attitude and family support has turned a lose-lose into a win-win.

# Academic ALL-STAR

12 UNIVERSITY OF WASHINGTON STUDENT-ATHLETES WILL BE CHOSEN THROUGHOUT THE YEAR FOR ATHLETIC ACHIEVEMENT, ACADEMIC EXCELLENCE, OUTSTANDING LEADERSHIP AND EXEMPLARY COMMUNITY SERVICE.

## Academic All-Star

### Andrea Morelli

Class: Senior, Women's Soccer

Double Major: Business and Psychology

GPA: 3.50

#### Accomplishments

- A first-team All-Pac-10 Academic squad selection in 1999 and 2000
- Earned first-team All-Pac-10 honors in 1999 and 2000
- Honored as 1999 Pac-10 Defender of the Year
- Member of the U.S. National "B" Team
- Played for the Seattle Sounders Select Squad
- Earned second-team All-America honors in 2000
- Helped UW defense register nine shutouts en route to 2000 Pac-10 Championship
- Voted team's Rookie of the Year in 1998

"Andrea has met and exceeded all of our expectations during her career. She puts so much time and effort into improving herself on the field and in school. She is a tremendous asset to our team in so many ways, and is invaluable to the development of our players, both as athletes and individuals."

— Head coach Lesle Gallimore

# Rick Neuheisel

When Rick Neuheisel attended the 1998 Rose Bowl, to be inducted into its Hall of Fame, he took the time to enjoy the moment and bask in the gala and pageantry of the college football game known simply as “The Granddaddy of Them All.”

As he watched the shadows creep over the Arroyo Seco, and the sun disappear into the western horizon, he turned to his wife, Susan, and said, “We’ve got to get back here someday.”

It happened sooner than he expected.

Three years later Neuheisel was back in the Rose Bowl, hoisting the championship trophy above his head to the delight of 40,000 Husky fans after Washington had dispatched Purdue’s Boilermakers 34-24.

After quarterbacking UCLA to a 45-9 victory against Illinois in the 1984 Rose Bowl, being inducted into the Hall of Fame, and coaching the Huskies to their seventh Rose Bowl championship, Neuheisel will long be considered one of the Rose Bowl’s favorite sons.

Neuheisel prefers to deflect the attention for Washington’s ascension back to the top of the college football ranks over the past three seasons. He will be the first one to credit his players and coaching staff for making the commitment to return the Huskies to dominance.

When he first arrived in Seattle in January of 1999, Neuheisel challenged the Huskies to forego any feeling-out process with a new staff and simply make a commitment to winning.

Head coach Rick Neuheisel signals in a play during the the 2001 season.

The results speak for themselves. During his first three years as a Husky, Neuheisel’s teams have placed second, first and second in the Pac-10 race. Washington has been ranked in the Associated Press poll for every game during the past two seasons. The Huskies have made two trips to the Holiday Bowl and one showing in the Rose Bowl under Neuheisel.

Last year’s team posted a 8-4 record that included six wins at Husky Stadium to extend the Huskies’ current home winning streak to 14 games. A young Husky squad faced five teams that were ranked in the final Associated Press Poll and picked up wins against three of those opponents.

Neuheisel’s second Husky squad, the 2000 team, posted the first 10-win season since the 1991 Huskies went 12-0 en route to the national championship. It was Washington’s first Rose Bowl title in 10 years and its first Rose Bowl appearance since 1992.

The 2000 Huskies were a remarkable team. Washington trailed in eight of its 11 wins, showing incredible resilience and heart, not to mention strategy, in pulling off five consecutive fourth-quarter comebacks in a row.

For his efforts, Neuheisel was listed as a finalist for coach of the year by several different media outlets.

In 1999, his first season as the head football coach at Washington, Neuheisel accomplished something that none of his predecessors achieved. He guided the Huskies to a 7-5 record, including an invitation to the 1999 Culligan Holiday Bowl, becoming the first UW coach to take the team to a bowl game during his inaugural season.

Husky football fans and casual sports followers alike have quickly embraced Neuheisel for the spark he has added to Washington’s storied football tradition. As a public speaker, he is in high demand. Neuheisel has spoken at numerous fundraising events and generated lofty contributions with his charismatic speeches and penchant for innovative fundraising ideas.

Neuheisel took over the Washington program in January of 1999 after serving as the head football coach at Colorado from 1995 to 1998. His six-year coaching record now stands at 59-24 (.711).

Washington is the second head coaching position for the 41-year old Neuheisel, who spent seven seasons as an assistant coach prior to securing the Colorado job. He worked six years at his alma mater, UCLA, under his college coach Terry Donahue, and was an assistant coach for one season on Bill McCartney’s staff in Boulder. He was named the head coach at Colorado on Nov. 29, 1994.

At Colorado, Neuheisel compiled a 33-14 (.702) record and was 3-0 in postseason bowl games. All three of his bowl games were against Pac-10 Conference opponents. He had 20 wins in his first two seasons as a college coach, which tied for the fourth-most by a first-time college coach in the Division I-A modern era. Both of those Colorado teams finished in the top-10 of the national polls.

## Neuheisel had a number of “firsts” while coaching the Buffaloes:

- He became the first first-year Colorado coach to take a team to a bowl game.
- The team’s 10 wins in 1995 were the most ever by a first-year CU coach.
- The Buffaloes’ No. 4 ranking in the USA Today standings and No. 5 ranking in the final Associated Press poll were the eighth-highest rankings ever for a first-year coach.
- Neuheisel’s 10 wins his first year tied for the fifth-most by a rookie.
- The 1996 Colorado team set a school record by winning 10 consecutive road games.

## THE NEUHEISEL FILE

### PERSONAL INFORMATION

**Full name:** Richard Gerald Neuheisel, Jr.

**Date of Birth:** Feb. 7, 1961 (Madison, Wis.)

**Father:** Richard Neuheisel (attorney, president of Sister Cities, International)

**Mother:** The former Jane Jackson

**Sisters:** Nancy, Katie, Deborah

**Marital Status:** Married to the former Susan Wilkinson

**Children:** Jerry (10; born April 25, 1992), Jack (8; born Aug. 16, 1994), Joe (5; born Jan. 16, 1997).

**Education:** McClintock High School, Tempe, Ariz.; BA, Political Science, UCLA, May 1984; J.D.; Law, Southern California, 1990; 3.4 grade point, Academic All-Pac-10.

### COACHING INFORMATION

Volunteer Assistant, UCLA, 1986

Assistant, UCLA, 1988-93

Assistant, Colorado, 1994

Head Coach, Colorado, 1995-98

Head Coach, Washington, 1999-

Career Head Coaching Record: 59-24

Assistant Coach Career Record: 52-28-1

**Playing Career:** Quarterback at UCLA, 1980-83; San Antonio, USFL, 1984-85; San Diego, Tampa Bay, NFL, 1987

**Notable:** Neuheisel held an NCAA record for 15 years, set against Washington in 1983: he was 25-of-27, the 92.6 percent completion percentage holding the record until Tennessee's Tee Martin was 23-of-24 (95.8%) against South Carolina on Oct. 31, 1998.

### TOP PLAYERS COACHED AS POSITION COACH

**All-Americans:** QB Troy Aikman (UCLA), WR J.J. Stokes (UCLA), WR Michael Westbrook (Colorado).

**Second-Team All-Americans:** QB Kordell Stewart (Colorado)

**All-Big 12 Performers:** QB Koy Detmer

**All-Pac-10 Performers:** WR Sean LaChapelle

**NFL Players (8):** Aikman, Detmer, Vance Joseph, LaChapelle, Stewart, Stokes, Westbrook.

- The 1997 Buffalo team produced three All-Americans, including Butkus Award winner Matt Russell.
- He is only the fourth coach to guide his first two teams to a pair of 10-win seasons.

The road that led Neuheisel into coaching was an interesting, if not a unique one. After finishing his college career with a spectacular performance in the 1984 Rose Bowl in which he was named the game's Most Valuable Player, he graduated from UCLA in May, 1984, with a bachelor's degree in political science. Neuheisel had a solid 3.4 grade point average, the highest of all graduating football seniors, and was named Academic All-Pac 10. He won the Jack R. Robinson and Paul I. Wellman awards from the school to honor his academic excellence, and also earned an NCAA postgraduate scholarship as he aspired to attend law school. Neuheisel was inducted into the Rose Bowl's Hall of Fame in 1998.

He played two seasons (1984,1985), with the San Antonio Gunslingers of the United States Football League. Following the 1985 USFL season (which was over by the end of summer), he decided to use his NCAA scholarship award and enrolled in law school at Southern California. The following summer, he joined the UCLA staff as a volunteer coach, specifically to tutor Troy Aikman on the UCLA offense. Aikman matured under Neuheisel's tutelage, and the two remain close friends to this day.

In 1987, Neuheisel played in the National Football League. He suited up for three games for the San Diego Chargers (starting two), and still holds a team record for completion percentage in a game (81.8, going 18-of-22 for 217 yards and a touchdown at Tampa Bay). He completed 40-of-59 passes in those three games for 367 yards and one touchdown, and added another touchdown rushing. Another claim to his short-lived NFL fame is that he is the last player to rush for a one-point conversion, running in a muffed PAT attempt at Cincinnati. This is forever a trivia answer, with the NFL now sporting the two-point conversion.

He closed out the season with the Tampa Bay Buccaneers, dressing for two games, but never getting the chance to play. He wore the same number at Tampa Bay (No. 7) that he wore for San Diego.

Neuheisel would again return to his alma mater, but this time in the capacity of a full-time assistant coach in charge of the quarterbacks, which he would coach for the next two seasons before switching to receivers coach in 1990.

While an assistant at UCLA, Neuheisel continued his studies in his pursuit of a law degree. He graduated from the University of Southern California School of Law in 1990 with his juris doctor degree. He would be sworn into the Arizona State Bar Association in May of 1991, and the Washington, D.C., Bar in March, 1993.

Neuheisel began his collegiate playing career as a walkon at UCLA, holding for kicker John Lee, and eventually battled Steve Bono for the starting quarterback job by his senior year. He secured the starting job four games into the regular season and quarterbacked the Bruins to the Pac-10 championship in 1983, earning honorable mention All-Pac 10 honors in the process. He was named the Most Valuable Player in the 1984 Rose Bowl when UCLA beat Illinois, 45-9. In that game, Neuheisel completed 22-of-31 passes for 298 yards and four TDs, including a pair to Karl Dorrell, who later

became Washington's offensive coordinator.

Neuheisel completed 198 of 290 passes for 2,480 yards and 15 touchdowns in his UCLA career, which at the time placed him sixth on the Bruins' all-time passing yards list. He still holds school records in completion percentage for both a single season (69.3 as a senior) and career (68.3). Another school record he still holds, completion percentage in a single game, set an NCAA record at the time; Neuheisel completed 25 of 27 passes (including 18 straight at one point) for 287 yards against Washington in 1983, a remarkable 92.6 percent.

He graduated from McClintock High School in Tempe, Ariz., in 1979, and was the school's most outstanding athlete his senior year as he lettered in football (quarterback), basketball (guard) and baseball (shortstop, outfield, pitcher). He is a member of McClintock's Hall of Fame.

Richard Gerald Neuheisel, Jr., was born on Feb. 7, 1961, in Madison, Wis., where he made his debut as a head coach when CU beat Wisconsin 43-7. He is married to the former Susan Wilkinson, and they have three children, Jerry (10), Jack (8) and Joe (5).

Neuheisel's father, Dick, was one of the original Tempe Diablos, a group which helped found the Fiesta Bowl, and is a former president of Sister Cities International, a worldwide goodwill organization. The son of Dick and Jane, Rick has three sisters, Nancy, Katie and Deborah. From his home on Lake Washington, he occasionally drives his boat to work. He has been a semi-regular participant on the Celebrity Golf Association Tour. In 1999, a month before the U.S. Open at Pebble Beach, he shot a 74 on the course.

## UNIVERSITY PRESIDENT DR. RICHARD L. MCCORMICK

**R**ichard L. McCormick became the 28th President of the University of Washington on September 1, 1995. Educated as a historian, McCormick had a highly successful career as a faculty member and scholar before moving into academic administration. During his first six years at the UW, his leadership has been felt in almost every area of the University's work.

McCormick's top goal as UW President is to preserve and enhance the academic excellence of one of the nation's best public research universities. This means recruiting and retaining outstanding faculty, investing in programs of teaching and research for the future, and obtaining the resources to fulfill these goals. McCormick's leadership contributions include the University Initiatives Fund, a program of budgetary reallocation for new, interdisciplinary opportunities; Tools for Transformation, a program for supporting innovative transitions in the academic units; and a new emphasis on undergraduate involvement in research and other forms of experiential

learning. McCormick has traveled extensively in Washington to reach out to citizens across the state, strengthened the UW's ties with K-12 schools and community colleges, and provided leadership for increasing the diversity of the UW's faculty, staff and students.

From 1992 to 1995 McCormick served as Provost and Vice Chancellor for Academic Affairs and as Executive Vice Chancellor at the University of North Carolina at Chapel Hill. Prior to that, he was Dean of Arts and Sciences at Rutgers University from 1989-92 and Chair of the Department of History at Rutgers from 1987-89.

McCormick received his B.A. in American Studies from Amherst College in 1969 and a Ph.D. in History from Yale University in 1976. He began his teaching career at Rutgers as an assistant professor of history in 1976 and was promoted to associate professor in 1981 and to professor in 1985. President McCormick is the author of three books and numerous articles on American political history. In 1985 he held a prestigious John Simon Guggenheim Foundation Fellowship.

McCormick is actively involved in the work of a number of national and international education organizations including the Association of American Universities; the Association of Pacific Rim Universities; the American Association of Colleges and Universities, on whose Board of Directors he serves; and the Business-Higher Education Forum. He is also involved in several local and regional organizations including Seattle's Alliance for Education; the Seattle Community Development Roundtable; and the Greater Seattle Chamber of Commerce, on whose Board of Trustees he serves. McCormick is a member of the Board of Directors of the Advanced Digital Information Corporation.

McCormick is married to Suzanne Lebsock, a professor in the UW's history department. Lebsock also held a Guggenheim Fellowship and is the author of many scholarly articles and two books, one of which won the 1985 Bancroft Prize for the best book in American History. She recently held a MacArthur Foundation Fellowship, sometimes called a "genius" award. McCormick and Lebsock have two children, Betsy and Michael.

## DIRECTOR OF ATHLETICS BARBARA HEDGES

**W**hen it comes to recognition, Washington athletic director Barbara Hedges would prefer that the spotlight fall on Husky student-athletes. Still, it is hard not to acknowledge her accomplishments.

Hedges has built the Husky athletic program into one of the most successful in the nation in a variety of ways. During the past decade, Washington's athletic teams have enjoyed unprecedented success. The Husky program is also recognized as a leader in gender equity, community service and outreach programs and Student-Athlete Support Services.

Most recently, Hedges has focused on improving Washington's athletic facilities by more than \$100 million.

Her hard work has not gone unnoticed by her peers. In 1999-2000 Hedges was named the NACDA/Continental Airlines Athletic Director of the Year for the NCAA Division I West Region. She was presented the Honda Award of Merit and the Seattle/King County Sports and Events Council named her their MVP of the Year Award Winner.

There is a chalkboard in Hedges' office filled with inspirational messages, quotations and philosophies provided by her staff and visitors. One of her passages reads, "Hope is not a strategy." It is very appropriate. The successes for Washington's athletic programs during Hedges' tenure that have earned her so many acknowledgements have been forged in hard work, planning and a commitment to excellence, not just wishful thinking.

The past few years are dramatic proof that Hedges' approach to building Washington's overall athletic program into one of the best in the country have been successful. Many of those successes have not been measured in wins and losses.

Washington is currently in the second phase of its highly-successful "Campaign for the Student-Athlete" that has helped to generate several major capital improvements on the Montlake Campus. In November of 2000 the newly renovated Bank of America Arena at Hec Edmundson Pavilion opened to rave reviews. The facility also provides the Husky volleyball and women's gymnastics teams one of the best collegiate venues on the West

Coast. The Arena's expanded lockerrooms, training room, equipment room and new breakout meeting rooms benefit the entire athletic department.

The Arena is also home to numerous community events including high school championship tournaments and graduation ceremonies.

The project also provided a home for the new \$1 million Husky Hall of Fame that opened in the fall of 2002. For the first time ever, Husky fans and campus visitors have the opportunity to relive Washington's rich athletic tradition with an exhibit room dedicated to documenting over 100 years of achievements. The Hall of Fame spans the entire length of the west end of Bank of America Arena.

During September of 2001 Washington opened the \$29 million Dempsey Indoor multi-purpose practice facility. With over 100,000 square feet of competition space, Washington's student-athletes have the nation's finest multi-purpose practice setting for year-round training purposes.

In 2000, Hedges' relationship with the NFL's Seattle Seahawks resulted in a \$1 million gift towards the installation of a FieldTurf playing surface in Husky Stadium. Washington became just the second major college football program in the nation to play on the surface that has won rave reviews from players on both the collegiate and professional levels.

In 2001 Washington added a new FieldTurf practice field on the east end of Husky Stadium.

Still to come are stadium projects for the new soccer and baseball fields and a renovation of the Conibear Shellhouse.

It seems like Hedges' workload is never ending, but that is a reflection of her commitment to making the Washington program one of the best in the nation. The results have been proven on the field of competition.

In just her first year on the job, in 1991, the Husky football team posted a perfect 12-0 season by defeating Michigan in the Rose Bowl and winning the national championship.

Over the past six years the Husky women's crew team has won at least one NCAA event title and captured back-to-back team titles in 1997 and 1998, and again in 2001. During the past five years the Husky softball team has proven to be the single-best athletic team in a town that features professional teams in baseball, football, men's basketball and women's basketball, reaching the College World Series five of the last eight years.

In 2000-01, five Husky squads — men's and women's soccer, football, women's basketball and women's crew — won Pac-10 Conference titles, and nine of the 23 Husky teams earned final rankings in the top-15 nationally in their respective sports.

Under Hedges' direction the Husky golf, baseball and tennis programs have emerged on the national scene. Men's soccer, women's rowing and softball have all been ranked No. 1 in the nation during the past few years.

Hedges' efforts in gender equity have made Washington one of the national leaders in providing equal opportunities for both male and female student-athletes. In December of 1997, The Chronicle of Higher Education cited Washington as "the only Division I-A institution with an undergraduate enrollment that was at least 50 percent female to have achieved substantial proportionality in both scholarships and participation."

More important than just championships, under Hedges' guidance Washington has become one of the national leaders in participation for student-athletes and compliance. Last season over 650 student-athletes competed for Husky teams — the most in the Pac-10.

Hedges received her bachelor's degree in physical education from Arizona State University in 1963 where she was honored as the University's outstanding physical education major while also being named to Who's Who in American Colleges and Universities. She received her master's from the University of Arizona in 1971.

Hedges was born August 23, 1937, in Glendale, Arizona. She and her husband, John, have two grown children, Mark and Gregg.

# HUSKY ASSISTANT COACHES

**Keith Gilbertson**  
**Offensive Coordinator**  
**Tight Ends Coach**  
*Central Washington '71*  
7th season at Washington

Former head coach at Cal ... assistant to Dennis Erickson with Seattle Seahawks (1996-98) ... three seasons as Huskies' offensive coordinator (1991, 2000-01) are three of the most prolific offensive seasons in school history.

**Tim Hundley**  
**Defensive Coordinator**  
**Outside Linebackers Coach**  
*Western Oregon '74*  
4th season at Washington

Three-time all-conference linebacker and an NAIA All-American in 1973 ... has coached 11 NFL players during his career ... boasts one of the deepest positions on the team ... has also coached for Pac-10 rivals UCLA and Oregon State.

**Steve Axman**  
**Assistant Head Coach**  
**Quarterbacks Coach**  
*C.W. Post '69*  
4th season at Washington

Former head coach at Northern Arizona ... has coached NFL quarterbacks Troy Aikman (UCLA), Neil O'Donnell (Maryland) and Marques Tuiasosopo (UW) ... either Tuiasosopo or Cody Pickett have posted single-season passing yardage totals among the top-10 in Husky history in each of Axman's three seasons as quarterbacks coach.

**Bobby Hauck**  
**Defensive Backs Coach**  
*Montana '88*  
4th season at Washington

Coached safeties and special teams at Washington from 1999-2001 ... developed kicker John Anderson into a freshman All-American in 1999 ... has tutored nine all-conference picks as an assistant at Colorado and Washington, including Husky safeties Hakim Akbar and Curtis Williams in 2000.

**Randy Hart**  
**Defensive Line Coach**  
*Ohio State '70*  
15th season at Washington

Has won national championships both as a player (Ohio State, 1968) and coach (Washington, 2001) ... coached 1991 Lombardi and Outland winner Steve Emtman ... had two defensive linemen selected in the 2002 NFL Draft, including second-round pick Larry Tripplett.

**Chuck Heater**  
**Running Backs Coach**  
**Recruiting Coordinator**  
*Michigan '75*  
4th season at Washington

Has won Rose Bowls as both a coach (Washington, 2001) and a player (Michigan, 1971) ... moves to the offensive side of the ball after three seasons directing Washington's cornerbacks ... helped land 2001 and 2002 recruiting classes rated among the best in the country.

**Cornell Jackson**  
**Inside Linebackers Coach**  
*Sterling '86*  
1st season at Washington

Spent the summer of 1993 in Seattle as linebackers coach in the Seahawks' minority coaching development program ... at Houston in 2001, tutored Conference USA's co-Defensive Player of the Year ... mentored tailbacks J.R. Redmond, Terry Battle and Michael Martin in four seasons as ASU's running backs coach (1996-99) ... helped the Sun Devils lead the conference in rushing in 1996 and 1997.

**Bobby Kennedy**  
**Wide Receivers Coach**  
1st season at Washington

Is the Huskies' first full-time wide receivers coach since Karl Dorrell left for the Denver Broncos after the 1999 season ... was Arizona's running backs coach in 2001, helping Clarence Farmer lead the Pac-10 in rushing at 111.7 yards per game ... also coached receivers previously at Wake Forest and Wyoming.

**Brent Myers**  
**Offensive Line Coach**  
*Eastern Washington '82*  
3rd season at Washington

Earned Division II honorable mention honors on EWU's offensive line in 1981 ... played on Columbia Basin Junior College squad that won 1979 national championship ... in 1999, coordinated Boise State offense that was tops in the Big West Conference ... turned green Husky offensive line into an outstanding unit that should be a team strength in 2002.

## Other Football Staff

- Graduate Assistant Coaches:** Luther Carr and Ty Gregorak
- Strength and Conditioning Coach:** TBA
- Head Athletic Trainer:** Dave Burton
- Head Equipment Manager:** Tony Piro
- Director of Football Operations:** Jerry Nevin
- Compliance/Internal Operations Assistant:** Abner Thomas
- Video Operations Director:** Bill Wong
- Program Coordinators:** Liz Zelinski and Erin Chiarelli

### Roster Key:

( ) Indicates letters won

\* indicates redshirt season utilized • SQ - Squad member, has not played in a game • RS - Redshirted previous season

TR - Transferred to UW from previous playing season • 1V - Indicates number of years on varsity in which player has appeared in at least one game

## COACHING STAFF

**Head Coach:** Rick Neuheisel (head coach)

**Assistant Coaches:** Steve Axman (assistant head coach/quarterbacks), Keith Gilbertson (offensive coordinator/tight ends), Tim Hundley (defensive coordinator/outside linebackers), Randy Hart (defensive line), Bob Hauck (defensive backs), Chuck Heater (running backs), Cornell Jackson (inside linebackers), Bobby Kennedy (wide receivers), Brent Myers (offensive line), Ty Gregorak (defense graduate assistant), Luther Carr (offensive graduate assistant)

# FOREIGN AID

by Lucas Mack

**L**ast year, it took Washington's volleyball team until Oct. 16 to earn their 10th win, one of its last of the season in an 11-16 campaign. In 2002, the Huskies earned win No. 10 on Sept. 20, having spiked their way to a 10-1 mark to open the season, mirroring the 1996 season when Washington went all the way to the second round of NCAA Championships.

While many reasons can be credited for Washington's success, one cannot ignore the presence of sophomore Sanja Tomasevic, a transfer from her native Yugoslavia, who through 11 games led the team in service aces and ranked second in kills and digs. It is a testament to Tomasevic's leadership and work experience that this summer she was voted a captain by her teammates — before even once putting on the purple and gold.

Born June 3, 1980 in Priboj, Yugoslavia, Tomasevic has blossomed into a 6-foot-1 powerhouse. Her father Milutin, a professional volleyball player, encouraged Sanja and her younger sister to play volleyball, and constantly pushed them to improve.

"He thought it was a good sport for my sister and I to play growing up, because there was no physical contact with other girls," Tomasevic says.

Even as a young girl, Sanja showed a natural flair for the game, and was soon invited to join the Yugoslavian Junior National team, as well as several club teams in the nation, leading each to at least one league title during her tenure. After graduating from Medical Secondary School in Uzice, Yugoslavia, Tomasevic debated coming to the U.S. to play collegiately, but was persuaded to remain another year to help the Yugoslovian team compete internationally.

"I could have come to the U.S. after high school, but there was great pressure to stay and play for the national team," she explains. "I was told that volleyball over here is not very strong, but I see that is not true."

**Tomasevic, in her first year after transferring from Yugoslavia, was named captain before ever playing a game for the Huskies.**

Tomasevic has been impressed by the Huskies' weight room and coaching staffs, particularly second-year head coach Jim McLaughlin. American coaches, she says, care more about their players personally than did coaches in Yugoslavia, where athletes were often berated, or even struck physically.

"At home the coaches yell and hit girls; here, they are very nice," she says. "Jim is a good guy — he wants to make sure each of his players earns a degree, which shows that he really cares about us as individuals."

The team's extensive weight program has

also been a shock to Tomasevic, who says teams in Yugoslavia rarely worked on strength and conditioning.

"We never lifted weights like we do here," she says, "but it makes our team quicker and stronger. We are getting better every day."

Not all of the differences Tomasevic has noticed have related to volleyball, however.

"I was surprised to see how much food we can eat here!" she says. "One meal here is enough to feed a family where I come from. The food is very different here — there is a wide variety and bigger portions to choose from."

While being away from her home and family — which includes her fiancée of three months — has been difficult, the separation has been made easier by the presence of teammate Danka Danicic. Longtime opponents in Yugoslavia, the two have formed a close friendship since arriving in Seattle.

"We used to play and compete against each other, now we're like family," Tomasevic says. "We remind each other of home."

The two have no doubt made an impact on the Huskies' fast start this season, which includes a pair of tournament victories.

"Our record is hopefully a sign of things to come," Tomasevic says.

Thanks at least in part to Tomasevic, the Husky volleyball team is proving itself as a worthy contender in the Pac-10. Heads are being turned, as more and more seats fill for each home game at

Bank of America Arena.

Rarely does a transition of this magnitude work out for an individual, because of the many factors constantly working against them. For Sanja Tomasevic, though, there seems to be no problem at all. She is improving the Husky team while improving herself, and loving every second of it.

"You have to love the game if you want to play it well," she says.

If the level of her play is any indication, Tomasevic's love for the game can not be contained by borders.

## ROD JONES

### Tight End, 1984-86

While Ernie Conwell, Cameron Cleeland and Jerramy Stevens dominate recent talk about great Husky tight ends, none of them totaled as many career receptions as Rod Jones.

A star at the position for the Huskies from 1984-86, Jones totaled 75 career receptions, second only to current Pittsburgh Steelers tight end Mark Bruener on Washington's all-time list. The 1986 season was Jones' best, as he amassed 31 receptions for 309 yards and five touchdowns.

A first-team All-Pac-10 and honorable mention AP All-America selection in 1986, Jones played three years in the NFL, including a brief stint with the Seattle Seahawks in 1989.

# Berkeley Campus Boasts One of the World's Leading Academic Institutions

The University of California is one of the world's leading academic institutions. It attracts what many consider the finest applicant pool in the country, generates an ethnically and culturally diverse student population on campus, and provides one of the finest undergraduate and graduate learning experiences in the world today.

The Berkeley campus is renowned for the size and quality of its libraries and laboratories, the scope of its research and publications, and the distinction of its faculty and students. National rankings consistently place Cal's undergraduate and graduate programs among the very best.

The faculty includes eight Nobel Laureates, 122 members of the National Academy of Sciences, 19 MacArthur Fellows, 81 Fulbright Scholars, three Pulitzer Prize winners and more Guggenheim Fellows (137) than any other university in the country.

The quality of Cal's diverse and independent student body complements the stature of the faculty. More than 31,000 students annually enroll at Cal. Of these, about 22,000 are undergraduates, while about 9,000 are graduate students. Students come to Berkeley from all over California, in addition to every state in the union and more than 2,000 students from 75 countries around the world.

Overlooking San Francisco Bay, the campus is a lush and tranquil 1,232-acre oasis in an urban setting. Spacious lawns, hiking and running trails, as well as groves of oak, redwood and eucalyptus blend with the Neo-classical architecture of John Galen Howard. The University is bordered by the wooded rolling hills of Tilden Regional Park and the City of Berkeley, one of America's most lively, culturally diverse and politically adventurous municipalities.

Since its birth, the University of California has earned an academic reputation unmatched by any public university in America. According to a recent study by the National Research Council, Cal ranks first nationally in both the number of graduate programs in the Top-10 in their fields (97 percent) and the number of "distinguished" programs for the scholarship of the faculty (32 programs).

Although Cal is well known for its stellar graduate programs, undergraduate teaching is a campus priority. Nearly half of all courses offered at the undergraduate level have 25 students or fewer, and many lecture courses include smaller laboratory or study group sections which allow close interaction with professors and other instructors.

Cal offers more than 7,000 courses in nearly 300 degree programs. Each year, more than 8,500 students receive degrees from the University – about 5,500 bachelor's degrees, 2,000 master's degrees, 900 doctorates and 200 law degrees.

A myriad of activities also goes on outside the classroom. There are more than 350 registered student organizations, such as the Marching Band, Hang Gliding Club, radio station KALX, ethnic associations, humor

and literary magazines, debate team, Cal Corps (volunteer programs), Cal in the Capitol/Sacramento, and political organizations.

In addition, Cal has a host of other features, including public lectures and concerts, campus-sponsored forums and seminars, clubs and workshops, dramatic presentations, international festivals, art, photographic, design, architectural, anthropological and archaeological exhibits and displays, and dozens of bookstores within one-square mile – all of this making Berkeley one of the most intellectually stimulating communities in the country.

# SCOUT MASTER

by C.J. Bowles

**T**o many, the idea of being a walk-on athlete seems undesirable. Not only are walk-ons — more often than not — used solely for the starters to beat up in practice, they're paying for the right to do so.

Wide receiver Matt DeBord is a rare breed of walk-on — a senior. Many walk-ons don't last four days in a Division-I program, much less four years. DeBord has been treated like a rag doll in practice, and for what? So that other players can improve and revel in the glory of game day?

"There's nothing like Husky football," says DeBord of his decision to pass up scholarship offers to smaller schools and attend UW. "I went to go check out Western and see one of their games. I wouldn't say it was a high school football setting, but it can't even compare to 70,000 people in the stands. I'd always dreamed about playing football at Washington."

**Matt DeBord**

An academic standout with a 3.98 prep grade point average, DeBord passed up opportunities to attend

several Ivy League colleges for the chance to step on the field at Washington. It shouldn't come as a surprise to those who know DeBord, however — the receiver has never been one to back down from an opportunity to prove himself.

"I have two older brothers, and I think that's a big reason why I got into sports so much," he says. "All the time when I was little, I was fooling around, playing the sports that they were playing and trying to beat them. I'll never forget the day I beat one of my older brothers at one-on-one for the first time. It was one of the best days of my life."

Even in losing, however, DeBord learned important lessons.

"I can remember plenty of times when I was little, crying in the back room with one of my brothers on top of me, hitting me in the chest, or doing something," he says. "I always got picked on when I was little, and that definitely toughened me up."

DeBord could learn more about sports from

**DeBord twice earned the coaches' Scout of the Week honor for his work in game preparation.**

his family, however, than simply toughness. A cousin of DeBord's played football at USC, and his oldest brother, Dan, was an outstanding athlete.

"He never played football, but I think he was the one that had the most effect on me," DeBord says. "Watching him play in high school and college really motivated me the most."

While DeBord established Olympia High School records for receiving yards and touchdown receptions, his true calling may have been on the hardwood, where he was the MVP of the Rivers League in 1999, and an all-state selection that same season.

"I played basketball all the time," DeBord says. "It eventually just wore out on me. There's something special about football. You can only really put on the pads and play during a certain part of the year. You can play basketball anytime you want, anytime of day, and I just got worn out. Playing football, though, is a special experience."

After four years of being thrown to the turf by bigger and stronger players, DeBord shows no signs of regretting his decision.

"There's a lot of frustration with being a walk-on," he says. "No matter how well you think you're doing, it's not good enough. Sometimes, I've felt that I've played as a good as I could have played and it wasn't as good as the other guys. It's always harder as a walk-on, because you have to prove yourself. Scholarship guys are there for a reason, and they're given a chance to prove themselves. As a walk-on, you have to do everything perfect."

In his aspiration to perfection, DeBord has twice been honored as the team's Scout of the Week, including in 2000 when he "drove safety Hakim Akbar crazy" while simulating the routes and skills of talented Arizona State tight end Todd Heap.

"That award mostly comes from hard work," he

says. "The first time I got one was definitely the most special. Even though it's an award that just the team knows about, it's a cool experience for everyone to recognize that you've been working hard."

Personal glory, though, is not what keeps a walk-on coming back.

"The experience of Husky football is an amazing thing, in the community and everywhere," he says. "One of the biggest things is that I have a great group of friends on the team. I'm still having fun doing it, even though I feel a little bit like a tackling dummy out there."

DeBord finally got the chance to show his own skills in last year's 53-3 win over Idaho, and saw the field again in the Huskies' 38-7 win over Wyoming this season.

"My goal the whole time being here was to get on the field," he says. "Last year I got in, and it was an amazing experience. My goal is still to just help the team in any way I can, and hopefully get out on that field one more time."

The University of Washington wishes to thank the following Washington car dealers for their participation in the Husky Car Coach program.

# A Proud Tradition of Academic Excellence

**F**ounded in 1861, the University of Washington is one of the foremost institutions of higher education in the nation, richly combining its research, instructional and public service missions.

Its internationally acclaimed faculty includes five Nobel Laureates and the winner of the 1990 National Book Award for Fiction. Washington is part of an elite group of research universities whose contributions to American life are unique because they generate the basic knowledge upon which practical innovations are based.

The UW student body on the Seattle campus totals about 37,000, with an undergraduate enrollment of approximately 26,800. The UW also has campuses in Bothell and Tacoma, designed primarily for upper division (junior and senior) undergraduates and master's level graduate programs. Total enrollment at these campuses is about 3,600.

For more than 30 years, the university has been among the country's top five institutions in the dollar value of federal research grants and contracts awarded to its faculty. In 2000, the most recent year for which that data has been collected, the UW ranked second. Total grant and contract activity for 2001 exceeded \$700 million. More than 80 percent of the university's grant and contract funds come from federal agencies. Research contributes directly to the educational goals of graduate and professional students, as well as to those of undergraduates.

Instruction and research at Washington are supported by a library system that is one of the most extensive in the nation, consisting of five major units and 18 branches, as well as libraries at UW Tacoma and UW Bothell, together housing more than five million volumes. In addition to offering instruction in more than 100 academic disciplines, the university offers a spectrum of continuing education courses that advance technical and professional skills and provide opportunities for personal growth and enrichment.

Washington has 17 major schools and colleges: Architecture and Urban Planning, Arts and Sciences, Business Administration, Dentistry, Education, Engineering, Forest Resources, The Graduate School, The Information School, Law, Medicine, Nursing, Ocean and Fishery Sciences, Pharmacy, Public Affairs, Public Health and Community Medicine, and Social Work.

About 90 percent of the University's undergraduate students are state residents, although instructional programs draw students from every region of the country and overseas.

Most freshmen entering Washington are in the top third of their high

**The magnificent architecture of the Washington campus is replete with fountains, flowers and greenery.**

school graduating classes. In 2001, the average incoming freshman boasted a 3.63 high school grade point average and an 1,159 SAT score.

Beyond its academic and service missions, the UW has a strong economic impact on Washington and the Pacific Northwest.

With about 20,000 employees, Washington is the second-largest employer in King County. Washington operates the University of Washington Medical Center and Harborview Medical Center, which annually provide more than 200,000 days of patient care and record more than 300,000 visits to their outpatient clinics.

Washington also plays a critical role in attracting new business to the region. It provides these, and established businesses, with a steady stream of well-educated graduates and with highly skilled faculty members who assist business and industry in a variety of ways.

The University of Washington in Seattle is located on 703 acres in the city's northeast residential area, a beautiful setting on the shore of Lake Washington and Portage Bay. The majestic Cascade Mountains can be seen to the east and the Olympics loom to the west, while the western view includes downtown Seattle and Lake Union. The combination of this spectacular setting with buildings in both neo-Gothic and modern styles gives the campus a distinctive aura.

**Cherry trees literally burst with blossoms in the spring, turning areas of the campus a vivid pink.**

# HUSKY STADIUM POLICIES

## Stadium Policies

Stadium personnel have been instructed to enforce the policies in the interest of the comfort and safety of our patrons. Please give them your cooperation and report incidents to the ushering staff.

### Prohibited in Husky Stadium

- Alcoholic beverages or illegal drugs
- Smoking
- Video cameras
- Glass bottles, cans, thermos (in excess of two quarts), Bota bags
- Picnic baskets, ice chests
- Horns of any kind
- Sales of any unauthorized merchandise
- Banners, placards, leaflets not approved in advance by the Athletic Department
- Other conduct prohibited by U of W regulations or by law. Violators are subject to removal from the stadium and to applicable disciplinary action and /or legal action

### Telephone Locations

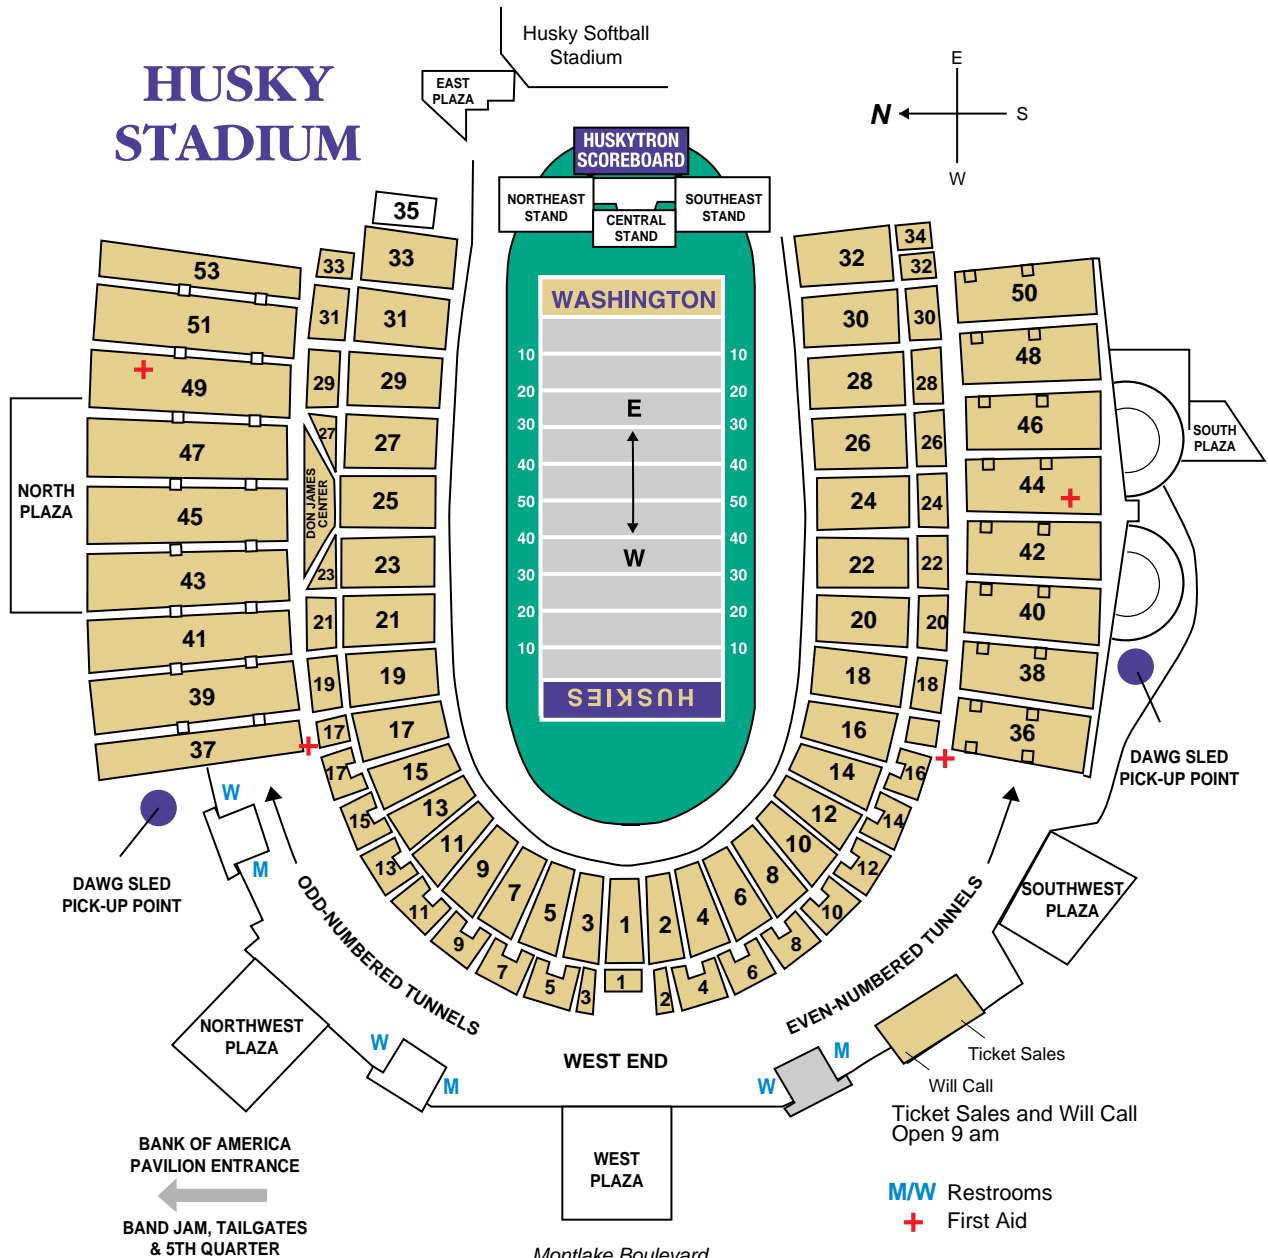

- North side: 2nd level, East and West ends
- West end: Between tunnels 2 and 4
- South side: 1st level, adjacent to tunnels 20 and 28

## Cardiac Care and First Aid

First Aid personnel are available at each First Aid station to respond to your medical needs. First Aid station locations are signed in the concourse areas and shown on the stadium diagram below. Ushers and University Police will be available for assistance in case of emergency. We suggest that known cardiac patients check in with the First Aid station closest to their seat location to have their blood pressure or heart rate checked or to simply rest prior to and during the game. Emergency cardiac care equipment along with fully-equipped Medic One ambulances are available. If there are any anticipated special medical needs by individuals attending the game, we ask that these are made known to the First Aid station closest to your seat location.

### Husky Stadium First Aid Station Locations and Numbers

South side:	S1	Second level, adjacent to Tunnel 44
	S2	Lower level, adjacent to Tunnel 16
	S3	Level 3, adjacent to Tunnel 8
West side:	W1	Peripheral building opposite Tunnel 10
North side:	N1	Lower level, adjacent to Tunnel 17
	N2	Middle level, adjacent to Tunnel 53
	N3	Upper level, adjacent to Tunnel 49
East end:	E1	Behind East End bleachers in softball stadium
Press Box:	P1	Located in Press Box hallway entrance

# Student-Athletes Need to be Aware of NCAA Initial and Continuing Eligibility Standards

by Rob Aronson

In an effort to ensure that student-athletes are capable of competing academically—as well as athletically—at the college level, the NCAA requires that entering students meet certain initial eligibility standards. The standards, consisting of an index comprised of SAT or ACT scores and high-school GPA in 13 “core” courses, have changed over time while engendering substantial debate.

In 1992, Division I adopted Proposition 16, effective in 1995, requiring an 820 SAT or 68 sum ACT minimum test score, and a minimum high school GPA of 2.5 in 13 core courses. In addition, a sliding, weighted scale permits the high school core course GPA to fall between 2.5 and 2.0, as the test score increases from the minimum 820 (SAT) or 68 (SUM ACT) to 1010 or 86, respectively. However, a student-athlete cannot be a full qualifier with a test score below 820 or 68, no matter how high is his or her GPA.

Numerous studies have been done concerning the minimum test score and GPA needed for a prospective student-athlete to have a reasonable likelihood of success at the Division I level. As might be imagined, these studies are not always consistent and not without controversy.

In the past few years, several developments have

made the rules more student-athlete “friendly.” The settlement of a lawsuit involving the NCAA and the Justice Department has resulted in better accommodation of students with learning disabilities; the decision concerning which courses should be counted as “core” courses has been returned for the most part to the high schools; and the NCAA Initial-Eligibility Waiver Appeals Committee can take a second look at the records of student-athletes declared ineligible by the Initial-Eligibility Clearinghouse. The Committee has separate subcommittees that look at home schooling, learning disabilities, foreign students, transcript changes, core course and grade point issues.

In addition to the initial-eligibility rules, the NCAA has continuing eligibility rules. For example, a student-athlete is ineligible for athletics competition if he or she fails to complete 36 quarter hours each year. The student-athlete must also maintain a certain GPA and complete an increasing number of credits towards his or her degree each year.

The NCAA is currently considering a number of proposals to modify both the initial-eligibility and continuing eligibility rules. The guiding principle will be to establish benchmarks a student-athlete must meet to become and remain eligible for competition. The benchmarks will be established to pro-

mote graduation within five years, rather than simply meeting minimal eligibility criteria.

It is therefore crucial that student-athletes and their parents understand the rules, and ensure that the student-athlete has complied with them, as early as possible – preferably before the student’s senior year of high school. Each high school must submit a “48-H” form indicating which courses it believes meet the NCAA core-course requirements. As early as the Spring of a student-athlete’s junior year in high school he or she may request a “form 48-C” determination as to whether courses taken by the student meet the NCAA core-course requirement and what the NCAA considers his or her core-course GPA to be. Any problems or issues can be dealt with over the summer or during the student’s senior year.

Those of us in athletics administration will do our best to make sure that current student-athletes are able to meet changing continuing eligibility rules. It is up to student-athletes, their parents, and their high schools to make sure they meet the changing initial-eligibility standards.

# Patience Pays Off

by Steve Hitchcock

**D**ayo (pronounced “DYE-oh”) Oyetuga is not the type of soccer player who is going to lose his cool — he’s aggressive, but patient.

Take, for example, the Huskies’ home opener against No. 25 Santa Clara. After quietly sitting on the bench for 59 minutes of a 1-1 deadlock, Oyetuga was subbed in by head coach Dean Wurzberger in an attempt to add a spark to the Huskies. Oyetuga sparked liked wildfire, assisting sophomore Brett Wiesner for the winning goal just 27 seconds after entering the game.

“Work hard, and it pays off,” Oyetuga says. “You never know what you’re going to get.”

If there’s one trait Oyetuga is all-too-familiar with, it’s patience. His father moved to Everett, Wash., from the family’s Lagos, Nigeria, hometown when Dayo was just a young child, making it difficult for the family to communicate.

“It was tough, because we didn’t get to see him at all for a while,” he says. “We had all our other family members in Nigeria and when I was little I lived with my grandmother, so that was pretty good. Still, though, we talked to my dad only every once in a while.”

It took two years of work in America before the senior Oyetuga could afford to move his sons — Dayo and younger brother Tola — to the United States. At first, the two brothers lived in New York for a year with their aunt, waiting for their father to earn

enough money to purchase a house large enough for the family. Finally, when Dayo was six years old, his father moved the children into the Everett home where they would spend the remainder of their childhood.

Though separated from his father for two

Oyetuga’s long road to Washington began in his native Nigeria, and included a stop in New York.

years, taken away from his relatives in Nigeria, forced to adjust to life in New York, and then in Washington, Oyetuga remained optimistic.

“It was a smooth transition, because my dad got his citizenship so we automatically didn’t have too many problems coming over,” he says.

“I just kind of fit into things, and the language was the same since English is the main language in Nigeria. The transition wasn’t as bad as you would think it would be for someone coming from Nigeria.”

Throughout the multiple moves that Oyetuga made, one thing remained constant — his love for soccer.

“We started playing soccer through my dad,” he says. “When I was little, he threw a ball at us and we started playing. My dad played pro with a club team in Nigeria. I don’t know very much detail about it, but I guess he was pretty good. Once we got here, we didn’t have anything else to do, so we just played soccer.”

As he grew up, Oyetuga became more and more addicted to soccer, eventually leading Everett High School to a fourth-place finish at state tournament his senior season. In the off-season, Oyetuga played on a club team with Ben Somoza and Doug Gliniak, and when both accepted scholarships to Washington in 1998, it seemed natural for Oyetuga to do so as well the following year.

Despite playing sparingly in his first season, Oyetuga led all Husky freshmen in scoring with two goals, both in an non-conference game against UNLV. The season promised to be one of huge offensive production for the first-year forward until tragedy struck. Before the 10th game of the season, Oyetuga broke his foot. The road to recovery was long, and only now is Oyetuga finally turning the corner to the road of success.

“The second year I was just going through a process of trying to get back on my feet, and trying to get things back together,” he explains. “I came in with my class [during his sophomore season] and everyone was ahead of me since I was out a whole year. I was kind of depressed, but after a while I just had to get over it and start playing again.”

Entering his senior year, Oyetuga’s mindset hasn’t changed — patience is still his greatest virtue. He is a leader too, and hopes that his commitment to hard work rubs off on the team’s younger players.

“My dad taught me to work hard, and try to get what you can out of life,” he says. “I just try to show the younger guys that hard work pays off sooner or later. You never know when, just keep working because sooner or later you’re going to get what you want.”

# Tropical Streams, Rivers 'Exhaling' Millions More Tons of Carbon Dioxide Than Thought

U.S. and Brazilian researchers say the amount of carbon dioxide coming off streams, rivers and flooded areas of the world's tropical forests is triple that of some currently accepted estimates, meaning such forests aren't the carbon sponges some scientists believe.

The new total of 900 million metric tons (about 2 trillion pounds) of carbon given off globally by tropical-forest waterways is comparable to, for example, about a fifth of the carbon dioxide generated each year by human activities such as deforestation and burning fossil fuels.

It matches the amount that some leading modelers have speculated was missing from tropical forests when they've tried to tally up the worldwide movement of carbon, according to Jeffrey Richey, professor of oceanography at the University of Washington.

The new calculations are possible because of a NASA-sponsored program giving the researchers access to radar imagery of a kind available only in the last few years. That data was then used in conjunction with river measurements from 13 National Science Foundation expeditions to the Amazon in the 1980s and '90s. The expeditions also were supported by the Brazilian government.

Global-carbon models come up short when using numbers from efforts in recent years to directly measure carbon dioxide in the air in, and just above, tropical forests. In contrast, Richey and his colleagues said that with the new numbers for waterways, the amount of carbon dioxide is actually about even, with as much being absorbed as is released by tropical forests.

Apart from technical problems that may be occurring while trying to directly measure carbon dioxide in tropical forests, "the land-water connection appears to be far more important

U.S. and Brazilian researchers use floating chambers to measure the flux of carbon dioxide from flooded areas of the forest in the central Amazon basin.

than anyone thought," Richey said. He and his group determined, for instance, that 20 percent of the carbon being released from streams and rivers was from aquatic processes, while the other 80 percent originated in the forest.

There the trees and other vegetation draw carbon dioxide out of the air during photosynthesis, using the carbon to create wood cells including roots and releasing oxygen back to the atmosphere. The carbon that ends up in streams and rivers is "swept" there by rains and floods that draw carbon out of the soil and carry woody debris, leaf litter and other matter downstream.

As the material decomposes and is eaten by organisms including insects and fish, and as river conditions change, carbon dioxide is released, or degassed, from surface waters. The resulting "river breath," as Richey termed it, turns out to be a significant downstream movement of carbon fixed by the forest.

And, although it's long been assumed that most carbon making its way into waterways just ended up in the ocean, Richey and his co-authors found 13 times more carbon is

degassed than reaches the sea.

"If you want to know where carbon from today's tropical forest goes, look a thousand kilometers downstream in 20 or 30 years," he said.

Their calculations are based on water chemistry measurements made by groups led by Richey in the Amazon basin, information that couldn't be scaled up to the degree now possible because there was no way to know the extent of water in the forest over the course of a year.

That became possible with a new kind of radar, a Japanese system to which the researchers had access as part of the National Aeronautics and Space Administration's Large-Scale Biosphere Atmosphere project. Used from satellites, the radar can measure the extent of water. The study quadrant was an area of 1.77 million square kilometers (690,000 square miles), which is more than four times the size of California.

Water covers between eight percent and 20 percent of the study area, depending on the time of year and amount of flooding.

# Racing out of the SHADOW

by Lucas Mack

Sports are so pervasive in modern America — on our televisions, radios, computers, billboards, magazines, etc. — that an athlete must often do something extraordinary to stand out among the rest. Husky junior Melissa Bennett, though, is having no trouble at all making a name for herself.

For much of Bennett's life, it's been her name that is the problem, as Melissa has attempted to step out of the long shadow cast by her older sister, Tami. Melissa followed Tami during their prep years at Seattle Christian School, where Tami broke the legendary Michelle Akers' state career scoring record, and followed her again at Washington, where Tami added the Huskies' career scoring record to her list of accomplishments.

Some players — and sisters — would have wilted under the pressure of carrying such a legacy on the back of their jersey. Melissa, however, turned that pressure into fuel. Three years after Tami's graduation from Seattle Christian, her state scoring record fell, but the record books didn't require too much reworking — it was Melissa who one-upped her sister, tallying 166 career goals to better Tami's record by 14.

It was a natural decision for Bennett to join her sister at Washington, as the two have supported each other throughout their careers.

"I love my family, and having their support and encouragement has always helped me," Bennett says. "I loved playing with Tami; she encouraged me a lot on and off the field. People compare us often, but she is such a great player, that I don't mind being compared

Through eight games in 2002, Bennett already has four goals and a Pac-10 leading 10 assists.

to her."

A Parade All-American and member of the U-16 U.S. National Team while at Seattle Christian, Bennett carried high expectations for herself upon her arrival at Washington.

"Because of Tami, I knew what the commitment was to the sport and to the team," she says.

Bennett made an immediate impact for the team, starting 20 of 21 games while finishing in a tie for fourth among all Huskies with five goals. Her chemistry with her sister provided the Huskies with arguably their most dynamic

offense ever. The Husky attack spread the field, allowing the defense to stay loose and make plays on the ball. Washington, as a team, broke 22 school records that season, including a final mark of 18-3 that was a 10-win improvement from the season before Bennett's arrival.

The 2001 season, which featured just one Bennett after Tami's graduation, was much of the same, with the team posting a 13-5 mark and reaching the NCAA Tournament for the second-consecutive season.

It is in 2002, however, that Bennett has begun to establish herself as an offensive force, independent of her sister. The Pac-10 leader in assists through Sept. 25, Bennett earned tournament MVP honors at the 2002 Husky Nike Invitational, displaying speed and scoring ability unmatched by her opponents.

"Last year was a challenge for me, but this year has been a blessing," she says. "I am blessed every single day that I am allowed to play soccer for the University of Washington. I love all my coaches; they have really helped my game improve."

Bennett credits her development not only to her coaches, but to the bonds shared by all those on the

Husky team.

"When I see our girls give a hundred percent on the field, it makes me want to work harder for them," she says. "Recruits are always surprised to see how close we are. We hang out off the field, which I think helps us play better on the field."

Whatever the reason, Bennett's play is certainly at an elevated level in 2002. No longer do Husky fans say, "Number five? That's Tami Bennett's little sister, Melissa."

Melissa Bennett has made a name all for herself.

# HUSKY ATHLETICS

## A Tradition of Success on the Field and in the Classroom

**H**usky Athletics is about young men and women competing on a national level athletically while succeeding academically at the University of Washington. This fall, 650 student athletes will don the purple and gold and compete for the Huskies on 21 teams. The cost to recruit and retain world class student-athletes is high. In 2001-2002, Husky supporters invested \$5 million in student-athlete scholarships. With the recent 16 percent increase in tuition, that figure will increase by \$400,000 this year.

### *Did You Know?*

**650**.....Number of student-athletes  
**3.0**.....GPA for fall 2002--17 of 21 teams  
**90%**.....2000-01 graduation rate for student-athletes completing eligibility  
**\$5 million**.....Cost of 2001-02 student-athlete academic support  
**\$400,000**.....Increase in 2002-03 due to rise in tuition

### HELP A HUSKY STUDENT ATHLETE

Because the athletic program is self-sustaining and does not receive state or University subsidies, this increased cost will need to be raised privately.

We will be asking all Huskies to consider making a contribution specifically earmarked for scholarship support.

### HELP YOURSELF

In addition to feeling good about helping Husky student-athletes, you will help yourself three ways: (1) This contribution is 100 percent tax deductible. (2) This contribution will count toward

important Tyee Points for Tyee seat holders. These points will be added immediately and will affect your 2003 football and basketball seats. (3) Scholarship donors \$5,500 and up will be invited to the annual Donor Appreciation Scholarship Luncheon and have a chance to meet the student-athlete they support.

*“Being at Washington has been a life-changing experience for me. My athletic scholarship has provided me the opportunity to explore new educational boundaries, and I will leave here a better person as a result. I will forever be in debt to Husky fans, who support the scholarship program.”*
